

# KNOW-HOW3000 Activities & Tools

# Experience Capitalisation

Joint-learning by reflecting on an experience and drawing lessons learnt. The methods for that include: systematisation, change stories, after action reviews, etc.

#### **KNOW-LYMPICS**

Knowledge sharing game, where Partners can win prizes for sharing their experiences in the form of "good practices" and "learning from failure" experiences.

#### **Communities** of Practice

Interest groups that interact regularly to learn more. They enable stronger networks and learning processes among organisations operating in similar areas.

#### **Sharing Events**

Local or regional faceto-face-events, where participants discuss their activities and experiences within a previously set topic or area of work in order to learn and improve their practice.

## Learning **Visits**

One (or more) HORIZONT3000 Partner Organisation visits another organisation and their projects to learn from their practice and methods applied.

# **Trainings**

Specific trainings either organised by HORIZONT3000 or by Partners themselves. They complement the partner organisations' work and methods, strengthen their structures and procedures and enable joint learning.

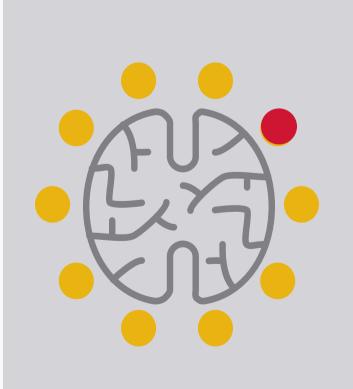

#### Borrow-a-TA

Partners might have a need for a short-term consultancy in a field of expertise, but a fulltime TA is not necessary. Borrow-a-TA provides short-term consultancy and allows more partners to profit from their know-how.

### Consultancies

Consultancies enable continuous capacity development measures facilitated by an expert for one or a group of Partner Organisation(s) and can involve coaching and mentoring activities, face-to-face and distance/remote consulting services.

# Follow-up Support

KH3000 activities are seen as part of a learning process, which includes follow-ups such as action plans or surveys. Additionally, Knowledge Management TAs are assigned to provide continuous support to Partner Organisations.

#### Internet **Platform**

The platform supports the planning and implementation of knowledge management activities and provides documents created within the network. It serves as a tool for TAs and their partners to find solutions for their projects.
